Phone no-9491288188

### PROFILE SUMMARY

---

PharmD graduate with formal training in Pharmacovigilance and hands-on experience in ADR reporting, ICSR documentation, and causality assessment (WHO-UMC). Knowledgeable in safety data evaluation, medical narrative writing, and basic MedDRA concepts. Detail-oriented and committed to ensuring drug safety and regulatory compliance.

### EDUCATION

---

| Course/Degree                    | School / University                                                     | Grade/ Score | Year      |
|----------------------------------|-------------------------------------------------------------------------|--------------|-----------|
| Doctor of pharmacy<br>[Pharm.D.] | K.V.S.R Siddhartha<br>College of Pharmaceutical<br>Sciences, Vijayawada | 83.3%        | 2020-2026 |
| Intermediate                     | Sri Bhavishya Jr College,<br>Vijayawada                                 | 90.5%        | 2018-2020 |
| SSLC[CBSE]                       | Nalanda Vidyaniketan,<br>Vijayawada                                     | 312          | 2018      |

### PROJECT

---

Corticosteroids Usage in Specific Medical Conditions in a Tertiary Care Teaching Hospital–  
*Academic project* [October 2024 – March 2025]

- Aim:  
To evaluate the prescribing pattern and clinical use of corticosteroids in various medical conditions.
- Purpose:  
To assess the rationality, indications, and safety of corticosteroid therapy based on standard treatment guidelines.
- Key Findings:  
Corticosteroids were effectively used, mainly for respiratory and autoimmune conditions.  
The study emphasized the need for guideline-based prescribing to enhance safety and optimize patient care.

### CERTIFICATIONS

---

- Currently Pursuing Advanced Certification in Pharmacovigilance – Clinetra Solutions
- Worked as a **Clinical Research Coordinator** in a Phase III, double-blind, randomized, multicentre clinical trial evaluating *Allopurinol for Cardiovascular Disease in Chronic Kidney Disease (CKD)*. Responsibilities included participant screening, conducting follow-ups, maintaining trial documentation, and coordinating with the Ethics Committee.
- Successfully completed a **Two-Week Skill Development Program in Pharmacovigilance** conducted by Clinetra Solutions, securing an A+ grade (June 2025).
- Completed a **Certification Course in Introduction to Pharmacovigilance and Drug Safety** offered by Biopharma Institute (May 2025).

---

## EXTRACURRICULAR CONTRIBUTIONS

- Participated in a Medical Camp organized by Dhanekula Institute of Engineering and Technology- Recognized for active contribution [2025]
- Contributed to organizing the 63rd National Pharmacy Week (NPW) – “Think Health, Think Pharmacy” at KVSr Siddhartha College

---

## TECHNICAL SKILLS

- Individual Case Safety Report (ICSR) data collection and case documentation
- Adverse Drug Reaction (ADR) identification and reporting
- Causality assessment (WHO-UMC scale), Medical narrative writing
- Literature review and safety data evaluation
- Clinical trial safety documentation
- Basic understanding of MedDRA coding and signal detection concepts

---

## KEY SKILLS

- Clinical knowledge, Adverse Drug Reaction (ADR) identification and reporting, Individual Case Safety Report (ICSR) documentation, Causality assessment (WHO-UMC scale), Medical narrative writing.
- **Tools:** Microsoft word, Microsoft Excel, PowerPoint.
- **Soft skills:** Effective communication, active listening, adaptability, problem-solving attitude, leadership qualities

---

## ACHIEVEMENTS

- Authored and published a **case report on symptomatic neuroglycopenia secondary to oral hypoglycemia agents**, demonstrating clinical assessment, ADR identification, and causality evaluation skills.
- Published a research article on the **prevalence of metabolic syndrome in COPD patients** in *International Journal of Research in Pharmacy and Chemistry (IJRPC)*, highlighting expertise in data analysis and patient safety evaluation.
- Presented a poster on “**Detection of Adverse Drug Reactions and Drug-Induced Toxicity Using Artificial Intelligence**” at the *Pharmanecia 4.E International Research Conference* (March 2025), emphasizing interest in signal detection and AI applications in pharmacovigilance.

---

## LANGUAGES KNOWN

Telugu: NATIVE

English: PROFICIENT
