PROFILE SUMMARY

PharmD graduate with clinical research experience and strong interest in Clinical Data Management. Skilled in clinical data collection, CRF documentation, data validation, and maintaining data accuracy as per protocol and ICH-GCP guidelines. Detail-oriented with a focus on quality control, data integrity, and regulatory compliance.

EDUCATION

Course/Degree	School / University	Grade/ Score	Year
Doctor of pharmacy [Pharm.D.]	K.V.S.R Siddhartha College of Pharmaceutical Sciences, Vijayawada	83.3%	2020-2026
Intermediate	Sri Bhavishya Jr College, Vijayawada	90.5%	2018-2020
SSLC[CBSE]	Nalanda Vidyaniketan, Vijayawada	312	2018

PROJECT

Corticosteroids Usage in Specific Medical Conditions in a Tertiary Care Teaching Hospital–
Academic project [October 2024 – March 2025]

- Aim:
To evaluate the prescribing pattern and clinical use of corticosteroids in various medical conditions.
- Purpose:
To assess the rationality, indications, and safety of corticosteroid therapy based on standard treatment guidelines.
- Key Findings:
Corticosteroids were effectively used, mainly for respiratory and autoimmune conditions.
The study emphasized the need for guideline-based prescribing to enhance safety and optimize patient care.

CERTIFICATIONS

- Currently Pursuing Advanced Certification in Clinical data management– Clinetra Solutions.
- Completed good clinical practice in NIDA clinical trials network.[February 2026]
- Worked as a **Clinical Research Coordinator** in a Phase III, double-blind, randomized, multicentre clinical trial evaluating *Allopurinol for Cardiovascular Disease in Chronic Kidney Disease (CKD)*. Responsibilities included participant screening, conducting follow-ups, maintaining trial documentation, and coordinating with the Ethics Committee.[June 2023-June 2025]
- Successfully completed a **Two-Week Skill Development Program in Clinical data management** conducted by Clinetra Solutions, securing an A+ grade (June 2025).

EXTRACURRICULAR CONTRIBUTIONS

- Participated in a Medical Camp organized by Dhanekula Institute of Engineering and Technology-Recognized for active contribution [2025]
- Contributed to organizing the 63rd National Pharmacy Week (NPW) – “Think Health, Think Pharmacy” at KVSRR Siddhartha College

TECHNICAL SKILLS

- Clinical data collection and entry
- CRF (Case Report Form) review and documentation
- Data validation and quality checks
- Basic understanding of EDC systems
- ICH-GCP awareness

KEY SKILLS

- Clinical knowledge, Decision making
- **Tools:** Microsoft word, Microsoft Excel, PowerPoint.
- **Soft skills:** Effective communication, active listening, adaptability, problem-solving attitude, leadership qualities

ACHIEVEMENTS

- Authored and published a case report on symptomatic neuroglycopenia secondary to oral hypoglycemic agents, involving systematic clinical data collection, structured documentation, and detailed case analysis.
- Published a research article on the prevalence of metabolic syndrome in COPD patients (IJRPC), demonstrating experience in clinical data compilation, data analysis, and interpretation of patient datasets.
- Presented a poster on “Detection of Adverse Drug Reactions and Drug-Induced Toxicity Using Artificial Intelligence” at Pharmanecia 4.E International Research Conference (March 2025), highlighting interest in data-driven safety analysis and structured data evaluation
